Ricardo Soliz
Facilities Engineering Manager
Houston Food Bank

To whom it may concern,

As the Facilities Engineering Manager of the Houston Food Bank, I am writing to you in support of Bobby Lemaire, President of PGW Solutions.

Over the past year, Bobby and his team have worked with me on several projects to improve our facilities. His team is very professional, knowledgeable, and detail-oriented. PGW Solutions has upgraded all lighting to LED for our facilities, both inside and outside. They have also completed many electrical projects for part of our remodel of admin offices. We recently installed our VRS (Voltage Recycling System), which has increased our facilities' efficiency. PGW Solutions has completed all projects timely, and communication is excellent.

I can't say enough about Bobby and his team. Their level of dedication to their clients and determination to find solutions speaks to their quality of customer service and support. I look forward to working with PGW Solutions on many other projects as we continue to grow. I highly recommend PGW Solutions for your business needs, and I am confident they will bring an invaluable professional relationship and service to your organization.

Very respectfully,

Ricardo Soliz
